FATTENING

*SUPPLEMENTS FOR SELF-PRODUCTION
OF FATTENING FEED*

WHAT IS IT

Products formulated to guarantee feed producers the certainty of obtaining feed capable of meeting the needs of their pigs during the fattening phase.

These supplements already include the best available on the international market today to optimize growth performance and to avoid the use of antibiotics.

BENEFITS APPROVED

- Optimization of the food conversion index
- Maintenance of growth homogeneity
- Reduced risk of diarrhea
- Perfect balance of amino acid needs
- Creation of a balanced and stable microbiota
- High possibility of nutrients digestion and assimilation

HOW TO USE IT

The range of supplements intended for the production of feed for fattening consists of a series of products starting from a percentage of inclusion of 1% up to products to be used at 5% that allow the production of all feed for the fattening stage from start-up to finishing.

WHAT IT CONTAINS

Vitamins, Trace elements, Amino acids, Acidifiers, Appetizers, Enzymes, Dried yeast from *Saccharomyces Cerevisiae*, Prebiotics, Salts.
